

I Wonder At It All

I meant to mean it when I said we're through
But I can't let go of you
You make the dreams I dream come true
Last night I lay awake and wondered at it all
How did we get to this place
Where small disputes like this displace
All the love we share
I wonder at it all

I know you knew it when I felt so bad
For being stubborn and a little mad
You mean so much to me
Every night I lie awake and wonder at it all
How can we be so in love
But allow these spats to be a part of
Everything we have
I wonder at it all

You know it's true I'm in love with you even when we fight
Please remember I'm in love with you I want to hold you oh, so tight

If the dreams I dream do come true
I'll always come home to you
To the comfort of your arms
Every night I lie awake and wonder at it all
How are we so fortunate?
Was it luck or was it fate?
It's a wonder every day
So I wonder at it all
Yes, I wonder at it all
