

You Had Me At Goodbye

I know you said you're leaving
But I can't believe it's true
I never thought you'd leave me
I didn't have a clue
We always stuck together
Through every kind of change
I never really worried
But now it feels so strange

You left me and now I want you back
 'cause you had me at goodbye
You said that our love had died
 But then you had me at goodbye

I took it all for granted
'til you walked through the door
And now I can't believe
I won't see you anymore

I thought we seemed so perfect
In every single way
What came between us
Let me know I pray

You left me and now I want you back
 'cause you had me at goodbye
You said that our love had died
 But then you had me at goodbye

I know you said you're leaving
But I can't believe it's true
I never thought you'd leave me
I didn't have a clue
We always stuck together
Through every kind of change
I never really worried
But now it feels so strange

You left me and now I want you back
 'cause you had me at goodbye
You said that our love had died
 But then you had me at goodbye
 you had me at goodbye
 you had me at goodbye
